Our Boston Letter.

Boston, Mass., October 5.

The stock market last week was t trader's affair, the pablic not appearing on the scene and with the likelihood of its not taking an active interest in stock sp cubstion for some time, or at least until after the election. The professional traders moved prices up and down within a narrow range, the week ending with prices but little changed from a weekingo. It is said that no downward movement of importance is probable until after the online has come into the market and beinger us file at still bligher prices than those now quoted, when the bears will have little difficulty in bring ing about a decided reaction by concert by the selling of long stock to re lize paper profits. No change in sentiment on the postneal outloon has taken place and Wall stre t still it mly believes in the success of Major McKinley at the polls next November. The inflax of gold threatens to cener for a while, as exchange rates have risen above the gold importing point, due to the smaller offerings of common y bills and the maturing of steeling boans. Up to date some \$43,000,000 g 11 bas arrived from Eq. rope on the present gold movement and several multi-hear-an own to be on the was which will moterally swell the grand total. When the mov ment started at was enlegiated that \$25,000,000, or possibly as much as \$30,000,000 gold, imp ried; the larger amount has served well as a bull argument on the stock market besid a exceeding expectations, About one half of the gold which has arrived has been deposited in the sub-treasusy bringing the gold reserve up to \$124,000,000 in round numbers and has helped to restore confidence, in addition to dispelling lears of another bond tesue by the government,

The copper mining shares have been active in a quiet way during the past week. Calumet and Heern has been noticeably strong and closed at 315 bid and 320 seked. The Calumet and Heela has paid \$20 in dividends so far this year and there are reasons for expecting another \$5 payment before the lose of the year, which will make \$25 for its 1896, record or more than in any recent year. Boston & Montana after rising above 90 settled back to 88. The dividend on 1,000 harm of Boston & Providence railroad tock, which is a 10 percent guaranteed stock, was off red for a year's dividends on 1,000 shares of Montana and bals to call the stock at various prices around 90 for short period were numerous. The street is still gossiping about a \$4 or \$5 dividend on Montana in November, but conservative people interested say that they expect only \$3, the \$2 regular for the quarter and the promised \$1 extra. Butte & Boston has advanced to 3, but nothing new relative to the proposed reorganization plan hasbeen developed. It is stated that a special se sion of the Montana circuit court will be held October 19 to give a bearing on the Butte case, particulars of which are lacking. Tecumseh holds firm on the expectation of further favorable develope ments concerning the rich strike in the shaft. Likewise, Osceola, which is interested in the outcome of the explorations in the Tecumseh mine. Piobeer gold stock has been strong on reports of a favorable nature from the mine. At the annual meeting of the Pioneer stockholders, to be held this week. Mr. Scott F. Bickford is expected to be elected a direc-

ter in place of Mr. Joseph M. Cox, resigned. The annual report of the Breece ron mine, which was issued this week, showed no cash in the treasury and said that the company had leased some of its claims on a royalty basis.

Reports of the purchase of the balance of the Anaconda stock by the Rothchilds are circulating, but it is stated that the transfer has not been made as yet. A conference is to be held in New York in a few days, however, and it is expected that the Rothchilds' agent will buy the remaining shares (the Rothchilds already own nearly one-half) and it is said that the deal will include the purchase of the entire capital of the Homestake gold mine which is one of the greatest gold

producing mines in the world.

The copper market has been dull, but rices have held firm in spite of the slack trade conditions. Lake ingot remains at 10% cents, although it is reported that the Calumet has sold a block of the metal tor export at slightly better than 10% cents. The total exports for the month of September from New York, Baltimore and Newport News loot up 10,880 tons fine, making the total exports for the first nine months of 1895 an increase of 40,215 tons or 85 per cent. With so much of the domestic production going abroad, it is evident that the home consumption must be very low at present. It also is evident that quotations for the metal must appreciate when the home consumption quickens as it will on a revival in business which is expected after the election. Commercial reports already show a better feeling among business men and with an easier money market trade in mercantile lines will improve in no small degree when the people express by their votes next month their determination to maintain the gold standard and reject the proposition of the demo cratic party to adopt cheap money with all its consequential evils. EVERETT.

That Campaign of Education.

The News has no desire to be wilder its readers, but as an independent paper it, as requested by many of its readers, intends to give from time to time the views of others than the party the editor himself thinks just now is, for the greatest good of the greatest number, the one to vote and work for, and trusts that after reading the various sides the majority of its readers will themselves sort the wheat from the chaff and cast their vote in November for McKinley and Hobart.

In accordance with the above, we today commence to publish Governor Altgeld's reply to Schurz and Cockran. We have also arranged with the leaders of the gold wing of the democratic party to publish some of their views and as many of our readers are prohibitionists we will also, as requested, give them a show by publishing the statements issued by the r national committee or the leaders of the

Last year we offered the chairmen of the different county committees space to air their views, but the prohibition party was the only one to accept the offer, and in consequence a few of the wise men, not of the east, but of Houghton, thought proper to go around and call ours "that prohibition sheet." There is no disgrace in being a prohibitionist, but as we have no desire to sail under false colors we have this year changed our cour e and in order to supply all our readers with ample-ubj ct for thought will publish, as a sted, the views of the different politea parties, but, of course, do not hold ourselves responsible for the statements made by them.

Demonta is no quack medicine. It hadone and is doing for the sick what no man's made remedy ever did, can or will, Call on P. Tommei, 351 Fifth street.

His Reply to Schurz and Cockran.

A REMARKABLE ADDRESS.

Single Standard Claims Knocked to Smithereens.

THE ISSUE IS CLEARLY SHOWN.

Address of Governor John P. Altgeld at Central Music Hall, Chicago-One of the Ablest Arguments In Favor of the Free Coinage of Silver Yet Made-An Exhaustive Consideration of the Subject.

I hold in my hand a printed copy of the speech of Mr. Carl Schurz, delivered in this city two weeks ago, and a like copy of the speech of Mr. Cockran, delivered one week ago. The first fills 12 columns of closely printed matter in a newspaper, and both have been advertised as the ablest arguments in favor of the gold standard that have yet been made. The gold standard advocates speak of them as containing Moses and the prophets, the law and the gospel of the money question. From the manner in which these people speak of them, we are warranted in con-cluding that every argument and every fact that can be marshaled upon that side of the question is contained in these speeches. This being the case, we naturally examine them with the deepest interest, for if the gold standard is to be maintained we want to know what we may reason ably hope from it.

No Hope In Either.

It would have given great relief to the minds of thousands of patriotic men to have had presented some balm for the ills of our land, and as I love my country or our land, and as I note in scarny to more than party or honors I am sorry to have to say to you that in these long speeches, containing, as we are told, the law and the gospel of the gold standard, there is not a line, not a sentence, not a syllable, that offers any hope to the Amertcan people. That we are in distress is not denied in either speech, but there is no suggestion of a remedy. The substance of the whole argument is that we will be better off and suffer less if we keep quiet and that the remedy proposed by the Chi-cago platform would only make matters worse instead of better, or, as Mr. Schurz puts it, the application of this remedy would be jumping out of the frying pan into the fire, and, if he is correct in this, then the only question which is left for the consideration of those of our people who are dying in the frying pan is wheth-er they would be any worse off in the fire.

McKinley Panacca. The straight out adherents of McKinley have a panacea. They realize the unsatis-factory conditions in our land and propose to remedy them by an increase of the tariff. They feel that some hope must be offered to the American people, and, having noth-ing else to present, they ask us to again try the idea of increasing the tariff tax.

They ask the people to shut their eyes to the fact that the distress from which

we suffer exists all over Europe as well as this country; that it exists in the countries having a high tariff and in countries having a moderate tariff and countries having no tariff at all and is clearly due to some cause that has no connection with the tariff. They ask us to shut our eyes to the fact that we have already a very high tariff and that the decline in prices began many years ago under a still higher tariff and that it went right on under the highest tariff ever known in this country, call ed the McKinley tariff. They ask us to shut our eyes to the fact that in 1838 the conditions in our country were unsatisfac-tory and that the remedy that was then tariff and that this immediately followed the election of Mr Harrison, when the famous McKinley bill was enacted. They ask us to shut our eyes to the fact that under that law wages were not raised, prices kept steadily falling and that immediately after its enactment in 1890 there was a marked reduction in wages in several hundreds of the largest manufacturing estab directs of the largest manufacturing estate-lishments of this country. They ask us to shut our eyes to the fact that while the tariff shielded the manufacturer in some cases against competition it permitted him to fill his factories with the cheapest kind of pauper laber brought from the fields of Europe, and thus, instead of raising the wages of the American workmen, not on-ly reduced their wages, but drove them out of employment. They ask us to shut our eyes to the fact that it was in the spring of 1892, while the McKinley law was in force and while Mr. Harrison was president, that the famous Homestead la bor riots occurred, being among the most bloody that ever took place in this coun that at that time the conditions of the laborer were rapidly getting worse, and the prices of Ame-'an products were steadily falling They ask us to shut our eyes to the fact that the McKinley law for the fiscal year ending June 30, 1894, pro-duced a deficit to the United States treasury of \$70,000,000. They ask us to shut our eyes to the fact

that neither the laboring man of this country nor of Europe has derived any substantial benefit from the tariff becau the employer is always permitted to fill his shop with cheap labor. They ask us to shut our eyes to the fact that the tariff is no longer a matter of theory, but a matter It has been tried, and it has been found wanting. Consequently with the adherents of McKinley it is a question in this campaign of socing how often they can fool the people. Both Mr. Schurz and Mr. Cockran ave been avowed enemies of this tariff. They cannot and they do not offer it as a remedy for any of the ills of the land, and having no other remedy to offer and seeing no prospect of a change for the better under existing policies they simply tell the patient that if he will only he still he will suffer less than if he at tempts to bestir himself. They have no remedy to suggest, but they strenuously object to permitting the people to do any-

thing toward belging themselves. That hishop who told an anxious negro that there were only two ways open for him, and that one led directly down to hell while the other led away off to eter had definition, was evidently the man who furnished the text for both of these speeches. The begre scratched his head and toplied, "If data so, mass, den dis-chile takes to de woods." And if Messrs, Schurz and Couran are correct then the

American people will have to take to the Not a Local Question.

In considering the question as to whether the demonetization of silver in the world reduced prices they shrewdly leave Europe out of consideration, shut their eyes to the fact that the effects produced there are the same as those produced here, treat the whole question as though it were local to our country and then argue that, inasmuch as there had not been many silver dollars coined in our country, and these that were coined went abroad because of the fact that they commanded a premium of 2 per cent, therefore the demonetization of silver in the United States could not have affected prices because there was (Continued on Page 3.) Not a Local Question.

The livery stable firm of Baril & Pearce has been deserved by mutual consent. and the business will hereafter be carried on by Mr. Thomas Pearce, who will settle all matters regarding the late firm. Mr. Pearce is well liked, and will, no doubt, succeed in obtaining a fair share of the livery business from this place. The Calumet stage leaves his barn daily at 8 and 10 a. m. and 1 and 4 p m.

Miss Bridget Mahoney, State vice-president of the Ladies' Auxiliary of the A. O. H., has organized a branch here with thirty-five members as a starter. The officers are: Pres d nt-Mrs. A. G. Kaufman.

Vice-President-Mrs. P. Carbary, Treasurer-Mrs. A. McLaughlin. Recording Secretary-Miss Kate Gaffney. Financial Secretary-Miss Annie Pope. Guide-Miss R. Cuddiby. Sentinel-Miss Mamie Leary.

From all accounts, the Houghton Board of Trade, whatever that may be. has decided to open a branch at this place. It is to be hoped that the clergymen and others having the well being of the young men of the place in mind will do all that lies in their power to stop the thing getting a hold here. There are, no doubt, many people in Houghton and Hancock who would indeed be glad if the Board of Trade" had never been estabished. We have heard that it has been found the only way to get ahead of the game is to start a game of your own and then sing "will you step into MY parlor said the spider to the fly," etc., and so get other sofnes to make up the losses.

Lake Linden is to have an ice rink the coming winter and one that will be a monster and also have all modern conveniences. This is something that has long been wanted and undoubtedly will prove a paying investment after a few sensons' run. The rink will be built on the lake shore, a few hundred feet from the post office. For many years the copper sand that has come out of the mills has been point up on the lake shore. Now it is proposed to run a launder over to the place where the rink will be built and have it filled in as th water is known not to be very deep. A force of men are at work on the launder and it will be ready for use in a short time. Mr. Sarazin, who will build thrink, inter ds to have a permanent edifice with a skating surface of 195 feet long and 49 feet wide. The rink is to have two or three waiting rooms and every effort will be made by the manager to have it finished in fine style.

County Huron

is situated 130 miles from De troit, 70 miles from Port Huron, and 68 miles from Saginaw, on what is known as the Thumb of Michigan.

This County is bounded on three sides by the waters of the Great lakes, which maintain an even temperature unaffected by the sudden changes which occur hundreds of miles furcher south. This creates a fruit growing country that isjunexceiled, in any northern state. Applies, p are, pums, and cherries find here their native home, and the trees are prolific beyond the belief of residents of other parts.

The soil is a rich clay loam which seems especially adapted to the growing of grasses. Unover will stay in the ground for years and frequently yields seven or eight bushels of seed to the acre.

frequently yields seven or eight customers, seed to the acre

The great bodies of water around us render fatal droughts impossible. Wheat, cats, cora, potatoes and peas are safe and profitable crops in this section.

The last report of the State Agricultural Department gives Huron County 96 per cent as the condition of her agricultural products. No County execlis her.

No man with ordinary industry and economy can fall to acquire a competence. This is the

No County excells her.

No man with ordinary industry and economy can fail to acquire a competence. This is the place where if you "Tickle mature with a harrow, she will laugh GOLDEN HARVESTS."

With sixty miles of scaboard and a hundred miles of rairroads within the county, the markets are convenient to every man's door and freight rates are cheap.

I am agent for various lands, a few descriptions of which are hereunto annexed and are: 1st-320 acres in sec. 25, Lincoln Township-125 acres improved, good clay soil, good state of cultivation, 15, miles from P. O. and store, 55 miles from railway, running stream through place—\$25 per acre.

2nd—320 acres in Sec. 24, Lincoln Township—about 20 acres cleared, good clay loam soil, running stream through place—\$25 per acre.
